

Weight Gauges

Features

- Accurate – average accuracy within 1% of full scale.
- 6" (160mm) diameter scale highly visible.
- Stainless steel construction and liquid filling ensures long life
- Protected – the gauge is operated by a gauge isolator so that it is protected from overload and lifting shocks.
- The gauge is only in use when you operate it.
- Low cost, accurate and reliable.
- Suitable for forklifts, bobcats and backhoes.
